Mate Series:

The CR Onsrud Mate Series CNC Router is an "All Onsrud," No Compromises, attractively priced solution for the demanding wood, plastic, aluminum, composite, & non-ferrous materials producer or fabricator.

There are even several sizes to choose from, ranging from 4' X 8' and up to 2M X 3M. Plus, the Mate Series includes the exact same factory provided onsite machine training, 5-years of advanced technical support with online remote diagnostics, 5-years of 24/7 Emergency Tech Support, and the same 2-year warranty package that comes standard on any Onsrud premium machine offering.

Pro Series:

The Pro Series is a moving gantry style CNC router where the table stays stationary while the bridge moves over its surface.

A moving gantry CNC router, when made correctly, is particularly well suited for panel processing applications.

Panel processors and cabinetmakers love the flexibility and production capabilities that the Pro Series design

offers. Sign makers and plastics fabricators typically like moving

gantry machines because of the lower

initial purchase price, while solid surface

fabricators like the large table-size-to-COST RATIO.
